Fire Alarm System Plan Review Application – Residential Systems

- ***Do not submit any plans to the fire prevention office unless this application is completely filled out!***
- Plans will not be reviewed unless the drawings are marked with the proposed fire alarm system devices (i.e. smoke, heat or carbon monoxide detectors).
- Three (3) sets of complete plans, drawings and specifications must be submitted for a plan review to take place and prior to any plan approval.
- The Town Building Official will determine whether an existing dwelling that is proposing an addition, renovation or major remodeling will need to submit fire alarm plans to the fire prevention office. The Town Building Official will make this determination by existing code requirements.
